Technology at work for humanity

We believe that by working together, we can triumph over the world's most challenging humanitarian crises. Our world-class systems make it easy and efficient for everyone from donors to nonprofits to governments to get the right aid to people when and where they need it most. Our team of passionate people is dedicated to creating and delivering tools and processes that bring people together to help others.

together we can triumph over humanitarian crises

OUR SOLUTIONS

- EASY TO USE
- QUICK TO DEPLOY
- HOSTED (SaaS)
- NO HARDWARE TO SUPPORT
- NO NEW I.T. STAFF TO HIRE
- COMMUNITY-FEEDBACK FOCUSED
- SUPPLY-CHAIN BEST PRACTICES
- REAL-WORLD RELIEF TESTED
- PARTNERSHIP DRIVEN

DISASTER-RELIEF SOLUTIONS

Respond quickly, but with quality aid that matches local needs. We partner with governments, donors and relief organizations to make this happen. Together with more than 35,000 agencies worldwide, we are working to improve the speed and quality of disaster relief. We build communities and tools that help each group share information with each other more easily. The Aidmatrix Network® is a disaster-relief supply chain that allows members to view donations and post specific needs, as well as access warehouse and logistics tools. The goal: Reduce the paperwork to focus on the relief work.

Our partners include: Accenture, UPS, FEMA, NATO, International Federation of Red Cross and Red Crescent Societies, National Voluntary Organizations Active in Disaster (NVOAD), numerous governments, and more.

HUNGER-RELIEF SOLUTIONS

Feed the body and you feed hope. Our partnerships with America's Second Harvest, Global FoodBanking Network, United Nations World Food Programme, and other food bank networks and hunger relief efforts in the USA, Canada, Haiti, India, United Kingdom, and South Africa do just this. They optimize communication between food bank, supplier and agency. As a result, less food is wasted and more food makes it to the local organizations that serve the hungry.

CONNECTING YOUR ORGANIZATION TO THE HUMANITARIAN-RELIEF SUPPLY CHAIN

At Aidmatrix, we are only as strong as our partners, which is why we partner with some of the most globally-respected nonprofits and donors and team up with government entities in our quest to help maximize positive impact. Our focus is to amplify donor contributions, accelerate results to nonprofits, and partner with governments to help make a bigger impact on the world, together.

TECHNOLOGY & PARTNERSHIP TO GET THE RIGHT AID TO PEOPLE WHEN & WHERE THEY NEED IT MOST

MEDICAL-RELIEF SOLUTIONS

Healthier citizens build healthier communities. To help, we form partnerships to create a medical-relief supply chain that links pharmaceutical and medical supply manufacturers and resellers to hospitals, free clinics and relief agencies. This community then works together to provide donated and/or discounted medical relief to agencies that serve the poor and uninsured in the USA and around the world. Meanwhile, relief agencies can work together to aggregate their purchasing power and negotiate better pricing as a result.

Our partnership with the National Association of Free Clinics (NAFC) and the award-winning FreeClinicLink™ program moved more than \$45 million in relief, to date. Programs with Vitamin Angels, International Health Partners, Meds and Food for Kids, and many more help address healthcare for those who need it most.

CORPORATE-GIVING SOLUTIONS

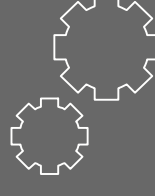

Make it "better business" to donate. Whether the donation is money, product, volunteers or transportation services, we provide corporate-giving solutions that make it easy. It can be as simple as a Virtual Aid Drive® that allows remote employees to participate in an online giving campaign or as complex as an integrated ERP solution. In either case, we make it better business to give rather than face disposal costs.

CORPORATE DONORS
We believe that teamwork can move mountains—mountains of food, clothing, and medical supplies for those that need them most—which is why we've partnered with globally-respected corporations, donors, and government organizations to do just that.

GOVERNMENT AGENCIES
We believe cooperation is the best way to make a significant impact on the world, which is why we help governments connect with donors and nonprofit organizations to help maximize positive impact.

RELIEF ORGANIZATIONS

We believe that partnership is the key to creating positive change, which is why we help nonprofits connect with donors and governments while optimizing internal warehousing and logistics to help maximize positive impact across the country and the world.
