

Supply Chain Management Suite

The Aidmatrix Network® for Humanitarian Relief offers a robust set of Supply Chain Management technologies. The solution includes a suite of modules that work together or independently to help empower your efforts to procure, manage and deliver humanitarian relief.

Let the technology help manage the paperwork so you can focus on the relief work.

PARTNERSHIP

Joining the Aidmatrix Network means you have a wealth of resources at your disposal. Aidmatrix provides program resources to make sure your program succeeds. A community of relief agencies, governments and corporate partners offers collective knowledge of best practices and practical solutions — meaning you are never in it alone.

TECHNICAL SUPPORT

Whether it be a training question or help with activating during a disaster — we are here to help. Our mission is to empower your team to maximize the humanitarian relief available to those in need.

TURN-KEY SOLUTIONS

We offer this service as a hosted application, so there is no hardware to maintain and no IT staff to hire.

For more information on any of our products or services please visit us on the Web at:
www.aidmatrix.org

Asset Registry

Work with the community of NGOs and local businesses to build a registry of assets that can be made available in the event of a disaster. Creates access for registered partners to update information. Provides simple “commit” process to track asset usage during a disaster response.

In-Kind Donations Management

Review, accept, receive and allocate in-kind product donations online. Includes call-center tools and real-time reporting that streamline your processes. Provides centralized location for donors to give and NGOs to receive.

Transportation Donations Management

Optimize the collection and tracking of donated transportation services. Review and accept offers online. Provides centralized website for transportation carriers to utilize.

Needs Management

Collect, organize, and display needs for products and services. Integrates automatically with In-Kind and Transportation Donations Management Modules.

Procurement

Organize purchasing of products and services. Enables collective buying power to negotiate discounted rates, aggregates purchasing trends, integrates with manufacturers' supply chains, product catalogs and more.

Online Warehouse

Track inventory in real-time. Receive goods, load into inventory, issue receipts—all online. Create kits and

catalogs. Monitor daily shipment and receipt activities. Run reporting, integration and administration with ease.

Advanced-Workflow Warehouse

Similar to online warehouse. Enables more complex integration into existing in-house applications to streamline workflow.

Online Ordering

Create a secure, online shopping site for your partners. Display your inventory; track, review and fulfill orders; provide real-time communication with partners.

Online Auction

Trade in surplus humanitarian relief inventory for points. Use points to purchase needed goods from other partners on the network. Optimizes timely consumption of available, and often perishable, resources.

Fleet Management

Track transportation fleet assets: Service records, odometer readings, mileage, registration, identification, inventory reports, and more.

Digital Hub

Use this internet-compatible, web-services framework to integrate into your existing, internal ERP or Supply Chain systems to optimize workflow and effort.
